

# POWER USER DIY ACADEMY

## CURRICULUM

Want to make your own changes and customizations to SP Marketplace products? The Power User DIY Academy is the same curriculum we use to train our customization specialists. It combines training videos, online live mentoring, and case scenarios into a full curriculum for your internal power user. After this training, your team will be in full control of getting the most out of the applications for your organization both now and in the future. Additionally, you will have access to the videos going forward for reference and future staff training. Whether you are new to SharePoint or a seasoned veteran, this set of courses will get you up to speed on what you need to know to take advantage of the 99.9% customizable portals and templates. The Academy includes:

- SharePoint Training – Basic and Power User level
- SP Marketplace Product Design and Architecture
- Application Services Layer tools
  - DFFS forms
  - Microsoft Power Automate Flows (Notifications, Approvals, Workflows, and other processes)
- First Project Mentoring
- Mentoring Support for 30 days (limited number of hours)

The training will include an Application Scenario Work Case that to be built progressively throughout the course. Each section includes video training after which a Q&A mentoring session for questions and to review the work case progress. During the trainings, your course instructor will be available online (MS Teams) for assistance.

All work case activities are performed on your Office 365 tenant so that you can reference later as well. The end-to-end target delivery period is 3 – 4 weeks, depending on the student's availability.

**Course Price: \$1995**
