Digital Workplace Best Practice Services

Transform Work with a Digital Workplace

Transforming your business in the cloud is more than deploying MS Teams and using email on Office 365. Its about using the platform to transform your business into a Digital Workplace. But how do you get from the pieces and parts delivered with Office 365 to an intuitive online structure design that delivers on the vision of a Digital Workplace?

That's where the Digital Workplace Design Service come in. We have worked with over 1400 organizations over the last 8 years to asses their current internal structure and map it to a Digital Workplace structure. This becomes your Workplace Architecture, which we provide a long term Roadmap for a successful evolution to the cloud.

Digital Workplace Design Service

“ Leveraging SP Marketplace proven best practices, and experience our move to a Digital Workplace was a great success! ”

Lloyd Cruz, IT Director Hirsh Pipe and Supply

Move from chaos to a consistent Digital Workplace structure on Office 365

Setting up an a Digital Workplace structure that drives self-service, communications, collaboration, and automates business processes takes more than an intranet home page and a bunch of isolated MS Teams. That's how you create Cloud chaos.

Like building a house, you need to start with an architectural design. We work with you as your Digital Workplace Architect. As part of the planning process we:

- **Educate** on what is a Digital Workplace, and why it is needed
- **Assess** your current organization, infrastructure and capabilities
- **Design** a Digital Workplace Portal Structure including governance, doc structure etc.
- **Apply** Office 365 and SP Marketplace modules needed
- Develop a **Roadmap** (plan) for implementation in phases

You now have a clearly defined path forward and are ready to start implementation.

With the Digital Workplace Portal Structure you will be able to:

Identify SP Workplace modules needed

Create a Migration Map for Files, Documents

Deploy SharePoint and MS Teams portals to provide a Base Intranet Portal Structure

Accelerate your transition to the cloud with:

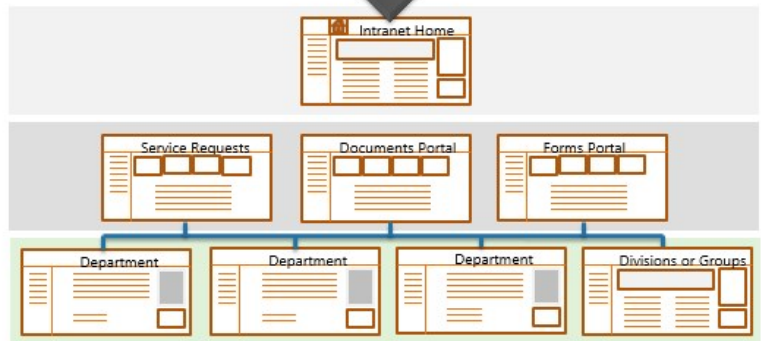

SP Workplace Solutions

Business Application Templates for Office 365 and SharePoint

Business Transformation Best Practices Approach

Office 365 Digital Workplace Platform

Other Best Practice Services
